

# The leading global provider of fax services

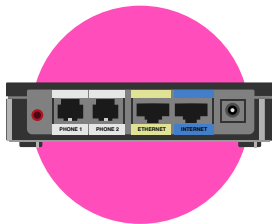

Whether you are a large corporation or a SMB, we have services scaled to your needs, all with the same high level of quality, security and reliability.

- Responsive, personalized customer support to troubleshoot errors, update access controls and clear roadblocks.
- High availability and quality of service backed by a multi-server, standards-based architecture for redundancy, business continuity and rapid disaster recovery.
- Trusted fax provider that is registered with the FCC and CRTC to provide telecommunications services in the U.S. and Canada.
- Cost-effective, flexible plans and pricing to meet the requirements of organizations large and small.

## Virtual Fax

- Send faxes directly from your email account or via the Cloudli web portal
- Perfect for workers who need work-from- anywhere capabilities, allowing them to receive and respond to faxes via their mobile, laptop or tablet
- Tailored solution for small businesses with low volume requirements, larger organizations with a distributed workforce, or businesses who need a faxing API to integrate with back-office systems

## Single-line ATA Fax

- Replace analog lines with IP connectivity
- Supports multiple inbound fax numbers
- Perfect for standalone fax machines or MFD's
- Easy to install, runs over your data network
- Very affordable with several flexible pricing options
- Includes all faxing to Canada/USA (excluding Alaska, Hawaii, Nunavut, NWT, Puerto Rico)

## Real-Time T.38 Fax

- Provides a real-time fax call, directly connecting your fax device with the remote fax device without any intermediary storage step
- Support high traffic volumes
- Offers optimal data protection with AES encryption and is HIPAA compliant
- Accepted legal form of document transmission
- Strong business continuity and incident recovery

# About Cloudli

Cloudli Communications is a leading provider of next-generation voice, messaging and data communications solutions.

We deliver a range of connectivity solutions that enable the future of work. That includes feature-rich unified communications, enterprise-grade SIP trunking and reliable fax technologies designed to seamlessly replace your legacy systems without compromising security or disrupting trusted and established workflows.

We put the customer in charge by developing affordable, flexible, feature-rich solutions that are designed to solve the frustrations our customers are facing. We also don't believe size should be restrictive: our solutions are accessible for micro SMBs and solopreneurs to enterprises alike.
